

REPORT OF THE APARTMENT MANAGEMENT SYSTEM

Project Description

Purpose

The purpose of this website is to develop a site that gives the information to the residents of the apartment and gives the information to the administrators of the residents.

Problem

People have difficulty in accessing up-to-date information about the apartment they are staying.

People have to meet with the manager one-on-one to pay their dues.

People need to take regular notes to keep track of their payments.

Problem Solution

With our website, everyone can access all information about themselves and the apartment with a single click, so they don't even have to leave their place to pay or to be informed about an upcoming meeting.

Abstract

With the website, users can access a lot of information about the apartment they are staying in.

Residents can track the income and expenses of the apartment.

They can easily pay their own debts with the membership system.

They can easily track the debts they have paid.

Admins can easily receive their requests / complaints.

Household information cannot leave the website. All information is stored securely.

This website is indispensable for managing an apartment complex

Type of Content in the site

The content on the website is for informing users and administrators.

The programming languages used and applications

Html(Actually not a programming language.)

Css(Actually not a programming language.)

Javascript

Php

MySql

Atom

Xampp
